

## Datasheet Vortex™ Professional Woodscrew Assortment Case

RS Stock No: 1456487

1700 pieces

Vortex™ screws are fully  
CE compliant to  
EN 14592:2008 & A1: 2012.

The recessed double countersunk head on the Vortex™ product range reduces the likelihood of shearing the head of the screw, whilst assisting the completion of countersinking, making it a more reliable product for users.

The sharp, wide and deep thread on the products feature 'Sawfix' serrated thread technology, enabling the product to quickly and easily power through surfaces, and can be used on a range of materials including hardwood, decking, MDF, plastic and sheet metal.

The high quality zinc and yellow waxed coating makes the screw easier to drive in, and increases the lifetime of the product.

### Case Contents
