EMC RECOMMENDATIONS

When used in a Class I system implementation (utilizing an Earth Ground connection as depicted in the schematic below), the VOF-S25C series requires additional inductance and Y-Caps to meet EN55032 Class B. These additional components are not required in a Class II implementation where no Earth Ground is present.

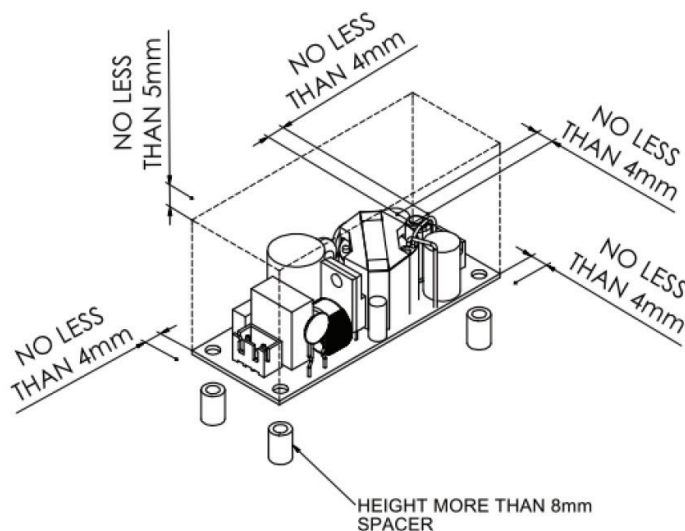

CHOKES			
Specification	Inductance	Duplex Winding/Turns	Manufacturers
UU9.8 R12K	10mH	2-UEW Φ 0.27*85Ts	SEND POWER

Y-CAP			
Subclass	Withstand Voltage	Capacitance	Manufacturers
Y1 CAP	250 V (min.)	1000 pF (typ.)	TDK

INSTALLATION INSTRUCTIONS

The VOF-S25C has four 3.5 mm diameter mounting holes; one in each corner. Use 8 mm tall spacers (6 mm outside diameter max) to mount the unit, which will maintain the isolation and vibration specifications. A minimum of 4 mm clearance is required for all four sides of the unit and a minimum of 5 mm clearance is required above the top surface of the unit.
