Cylindrical photoelectric sensor

SICK
Sensor Intelligence.

THE GR18 PRODUCT FAMILY: RELIABLE AND EXTREMELY VERSATILE

Thanks to their versatility, the cylindrical photoelectric sensors from the GR18 product family cover a very wide range of applications. With their seven different housing types, they are ideally suited for both space-saving and flexible mounting solutions.

One product family for all applications

GR18 cylindrical photoelectric sensors in the cylindrical M18 housing are outstanding in both the short length version (GR18S) and the standard length version (GR18), and offer an optimal price-performance ratio.

These sensors can be used universally in many applications thanks to the seven different housing designs:

- Photoelectric proximity sensors
- Photoelectric retro-reflective sensors
- Through-beam photoelectric sensors
- Photoelectric retro-reflective sensors for transparent objects

THE GR18 PRODUCT FAMILY

GR18S (SHORT HOUSING)

GR18 (LONG HOUSING)

At a glance

- Cylindrical M18 sensor with greater cost-effectivity
- Seven different housing designs
- Plastic or metal versions with straight or right angle optics
- Very bright and highly visible PinPoint LED
- Highly visible status indicator
- Rugged and reliable due to proven SICK technology
- Enclosure rating IP 67
- Special "fully flush" metal variant (GR18S)

Ideal for a broad range of applications

SICK's reliable photoelectric sensors are perfectly suited for numerous applications in the field of logistics: From mechanical engineering, through the automotive and electronics industries, right up to the packaging and shipping of goods of all varieties. This is because in any area in which material flows are automated or where sorting and warehousing processes are to be optimized, photoelectric sensors from SICK can guarantee maximum reliability and efficiency. Thanks to the simple hole mounting system of the standard M18 housing, the sensors can be flexibly integrated into automated environments.

THE GR18 CYLINDRICAL PHOTOELECTRIC SENSOR: OPTIMALLY DESIGNED DOWN TO THE SMALLEST DETAIL

Housing material for every application

The housing for the GR18 cylindrical photoelectric sensors is available in plastic and metal variants. This allows you to choose the right variant for every application and cost situation.

Metal and plastic housing

Optimal installation, even where space is limited

The GR18S housing is very short and therefore requires little installation space. Additional space can be saved through the use of housing versions with an angled radial design. These are ideal conditions for applications where there is very little space available for installation.

Straight and right angle optics (GR18S only)

For smooth processes

The front is flush with the installation area:
In this way the flush mounting kits of the GR18S cylindrical photoelectric sensors provide superior solutions for all challenges in which it is essential that the objects to be captured can pass without a hindrance.

Special "fully flush" designs

Rugged design

Photoelectric sensors from the GR18 product family run absolutely flawlessly, and are not sensitive to ambient light, dirt, moisture, or electrical interference. This makes these photoelectric sensors the ideal solution for every application.

Sensor technology from SICK

Maximum detection reliability

PinPoint technology from SICK, with its highly visible light spot, will facilitate commissioning, and increase the sensing range within the red emitted light area, without the need for any protective measures against lasers.

PinPoint technology from SICK

Comfortable: status indicator visible from any direction

Each GR18 cylindrical photoelectric sensor is equipped with a very bright LED status indicator. The current operational status can be recognized at a glance even from great distances. As a result, sensor commissioning and maintenance times are significantly reduced.

Highly visible status indicator

Sensing range: Quick and easy to adjust

The sensing range of the GR18 cylindrical photoelectric sensors can be quickly and easily adjusted using a standard Phillips-head screwdriver. No special tools are required.

Product description

The GR18 product family is enclosed in a cylindrical M18 housing and provides an optimal price-performance ratio. Due to its standard M18 housing design, it is suitable for universal use in many differ-

ent applications. PinPoint LEDs, plastic and metal housing versions as well as status indicators that are easily visible from all angles round off the sensor's features.

At a glance

- Economical M18 cylindrical sensors with standard housing design
- Choice of plastic and metal housing variants with straight optical output
- Very bright and highly visible PinPoint LEDs
- Highly visible status indicator
- IP67 enclosure rating

Your benefits

- A whole range of mounting options thanks to the different housing types
- Simple alignment and precise detection using PinPoint LEDs
- Easy to mount with simple M18 hole mounting. No special mounting brackets required.
- Rugged and reliable operation due to proven SICK sensing technology
- Clearly visible status display reduces maintenance and service time

Product description

The GR18S family of photoelectric sensors in cylindrical M18-housings has a special shortened design and offers an optimal price/performance ratio. It can be used universally in many applications thanks to five different housing designs. PinPoint LEDs, plastic and metal housing versions as well as status indicators

that are easily visible from all angles round off the sensor family's features. One highlight is the fully-flush metal variant, which has been especially designed for use in harsh industrial environments found in handling and warehousing systems.

At a glance

- Low-cost cylindrical M18 sensor with extra short housing
- Five different housing styles
- Variety of plastic and metal housing styles, with straight or right angle optics
- Bright and highly visible PinPoint-LED
- Potentiometer for adjustment of switching threshold (depending on type)
- Special flush type, one-piece metal housing
- Highly visible signal indicator LED
- IP 67 rating

Your benefits

- Space-saving solution due to short housing
- Flexible mounting options due to versatile housing styles
- Easy installation and precise detection due to PinPoint LED
- Reduced maintenance costs due to high tightening torque of single piece flush metal housing
- Rugged and reliable with proven SICK technology
- Highly visible signal indicator LED saves maintenance and commissioning time

SERVICES FOR MACHINES AND SYSTEMS: SICK LifeTime Services

Our comprehensive and versatile LifeTime Services are the perfect addition to the comprehensive range of products from SICK. The services range from product-independent consulting to traditional product services.

-  **Consulting and design**
Safe and professional
-  **Product and system support**
Reliable, fast and on-site
-  **Verification and optimization**
Safe and regularly inspected
-  **Upgrade and retrofits**
Easy, safe and economical
-  **Training and education**
Practical, focused and professional

SICK AT A GLANCE

SICK is a leading manufacturer of intelligent sensors and sensor solutions for industrial applications. With almost 7,000 employees and over 50 subsidiaries and equity investments as well as numerous representative offices worldwide, we are always close to our customers. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in various industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services round out our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
