INP-4065 - Wire Stripper 6 1/2" Insulated

Click to Zoom

The INP-4065 Insulated Wire Stripper can be used on various types of wire, whether single conductor or stranded, from 8 AWG down to 30 AWG. 6 1/2" Long.

This wire stripper is made from 60 CRV (chrome vanadium steel) for durability and long life. The stripping edges are strengthened using high frequency induction hardening for superior strength. The high leverage design provides superior stripping ability, and the rivets are made of 40 CRV (chrome vanadium steel) for toughness and to minimize side play. Includes adjustable stop and spring for easy opening. Guards are integrated into the dual color TPE plastic handle design to prevent contact with conductive parts while the soft ergonomic grips meet and exceed applicable IEC (IEC 60900) and VDE standards for high voltage protection. Tested to 10,000 VAC and rated to 1,000 VAC live use.

Tools are not recommended for use on energized circuits. Work should only be performed by qualified professionals. Do not use this tool if the insulation becomes damaged in any way. Tools must be kept clean and dry. Always inspect before use. Do not touch the uninsulated portion of the tool or any conductive object when either might make contact with an energized source. Always wear approved eye & clothing protection. Only use tools for their designed purpose and always follow OSHA 1910.333 (c)(2) and NFPA 70E 2004 when doing electrical work. Failure to observe proper safety precautions may result in serious injury or death.
