

LENOX Bi-Metal Reciprocating Saw Blade – Pack of 5

20566618R

- T2™ Technology Tooth design delivers up to 2x longer life
- Power Blast Technology™ increases blade life
- Aggressive tang geometry for faster cuts
- 0.9mm Blade thickness for faster cutting performance
- Tooth designs and set geometry for longer blade life
- 18 TPI toothing for successive medium metal cutting

Description:

The LENOX Bi-Metal Recip blades 18 TPI feature patented T2™ Technology, which reduces cutting forces on each tooth and optimizes chip removal to allow efficient cutting in the widest range of materials. The high speed blasting along the cutting edge strengthens the blades to reduce breaks and increase durability. The blade is designed to minimize friction and heat build-up while cutting.

Specifications	
TPI	18
Size	152 x 19 x 0.9 mm
Blade Quantity	5
