

## Lipped Straight Shrink Boots, High Ratio

Straight lipped high ratio boots are used when the cable or wire bundle is much smaller diameter than the adapter. Choose Type 1 high performance elastomer for extreme temperatures and excellent resistance to fuels and oils, Type 2 non-halogenated flame-retardant polyolefin for use where limited fire hazard is required, or choose Type 3 general purpose polyolefin for use where occasional exposure to heat and chemicals may occur.
