## Product Details

### **1651101 mobilux DIGITAL Touch INSPECTION**

The Mobilux® Digital Inspection is a new portable video magnifier that features a 4.3" HD touch screen with TFT LCD display, bright LED illumination and built-in measuring software. It allows users to inspect incoming and outgoing goods and warehouse & production samples to ensure products meet quality control standards.

In areas such as manufacturing, quality control and repair, Mobilux® Digital Inspection is an ideal tool for non-contact, optical inspection - either at the workbench, on the production line, or in the field. The magnification ranges from 4x to 15x and includes the middle powers of 5x, 6x, 8x, 10x and 12x and also provides time and date information.

The Mobilux® Digital Inspection has an automatic shut-off feature after 5 minutes of non-use to save battery power, and 5 contrast modes so users can customize the colours of the text and backgrounds to their individual needs. It also includes a removable 4GB SD card that stores up to 10,000 photos, which are downloadable to a PC or Mac computer through the included USB connection.

When connected to a PC, a live image of what is seen on the Mobilux® Digital Inspection can also be seen on a computer monitor for an even larger view!
